Lesson Plan

Name : **Ravi Bansal**
Discipline : **Common for all branches**
Semester : **1ˢᵗ**
Subject : **Applied Mathematics-I**
Session : **2023-2024**
Work Load : **4 Theory Lectures per week**

Lecture No.	Topics
1	Complex Numbers: definition of complex number, real and imaginary parts of a complex number
2	Polar and Cartesian Form and their inter conversion (L-1)
3	Polar and Cartesian Form and their inter conversion (L-2)
4	Conjugate, modulus and amplitude of complex numbers
5	Addition, subtraction, multiplication and division of complex numbers
6	Logarithms and its basic properties (L-1)
7	Logarithms and its basic properties (L-2)
8	Logarithms and its basic properties (L-3)
9	Meaning of ^nP_r & ^nC_r (mathematical expression)
10	Binomial theorem (without proof) for positive integral index (expansion and general form)
11	Binomial theorem for any index (expansion up to 3 terms - without proof) (L-1)
12	Binomial theorem for any index (expansion up to 3 terms - without proof) (L-2)
13	First binomial approximation with application to engineering problems
14	Evaluation of determinants (upto 2nd order)
15	Solution of linear equations (upto 2 unknowns) by Crammer's rule
16	Definition of Matrices and its types
17	Addition, subtraction and multiplication of matrices (upto 2nd order).
18	Concept of angle, measurement of angles in degrees, grades, radians and their conversions (L-1)
19	Concept of angle, measurement of angle in degrees, grades, radians and their conversions (L-2)
20	T-Ratios of Allied angles (without proof), Sum, Difference formulae and their applications (without proof) (L-1)
21	T-Ratios of Allied angles (without proof), Sum, Difference formulae and their applications (without proof) (L-2)
22	Product formulae (Transformation of product to sum, difference and vice versa) (L-1)
23	Applications of Trigonometric terms in engineering problems such as to find an angle of elevation, height, distance etc. (L-1)
24	Applications of Trigonometric terms in engineering problems such as to find an angle of elevation, height, distance etc. (L-2)
25	Cartesian and Polar co-ordinates of points (two dimensional)
26	Distance and mid-point between two points
27	Centroid of a triangle with given vertices, Slope of a Straight line

28	Equation of straight line in various standards forms (without proof); (slope intercept form, intercept form, one-point form, two-point form, symmetric form, normal form, general form) (L-1)
29	Equation of straight line in various standards forms (without proof); (slope intercept form, intercept form, one-point form, two-point form, symmetric form, normal form, general form) (L-2)
30	Intersection of two straight lines, concurrency of lines
31	Angle between straight lines
32	Parallel and perpendicular lines, perpendicular distance formula
33	Conversion of general form of equation to the various forms.
34	General equation of a circle and its characteristics.
35	To find the equation of a circle when Centre and radius are given
36	To find the equation of a circle when three points lying on it
37	To find the equation of a circle when Coordinates of end points of a diameter are given
38	**MATLAB Or SciLab software –** Theoretical Introduction
39	MATLAB or Scilab as Simple Calculator (Addition and subtraction of values – Trigonometric and Inverse Trigonometric functions) – General Practice (L-1)
40	MATLAB or Scilab as Simple Calculator (Addition and subtraction of values – Trigonometric and Inverse Trigonometric functions) – General Practice (L-2)
41	Revision of Unit-I
42	Revision of Unit-I
43	Revision of Unit-II
44	Revision of Unit-II
45	Revision of Unit-III
46	Revision of Unit-III
47	Revision of Unit-IV
48	Revision of Unit-IV
49	Revision of Unit-V
50	Revision of Unit-V

Note: Class Test and Sessional Exam will be given as per Academic Calendar.
